Buffered Bullish Return Notes linked to iShares MSCI Emerging Markets Index Fund

# Description

Report Prepared On: 04/29/13

Bank of Montreal issued \$1.56 million of Buffered Bullish Return Notes linked to iShares MSCI Emerging Markets Index Fund on March 18, 2013 at \$1,000 per note.

These notes are Bank of Montreal-branded Buffered PLUS securities that do not pay periodic coupons, but instead pay a single amount at maturity depending on the final level of iShares MSCI Emerging Markets Index Fund.

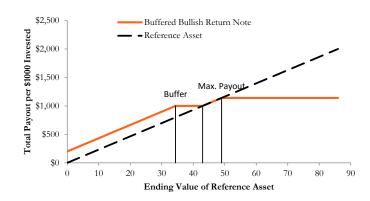

If on March 13, 2015 iShares MSCI Emerging Markets Index Fund's share price is higher than \$42.98, but lower than \$49.00, the notes pay a return equal to the percentage increase in iShares MSCI Emerging Markets Index Fund, up to a cap of 14.00%. If on March 13, 2015 the refe is below \$42.98 but not below \$34.38, investors receive \$1,000 face value per note. If iShares MSCI Emerging Markets Index Fund's share price on March 13, 2015 is lower than \$34.38, investors receive face value per note reduced by the amount the reference asset is below \$34.38 as a percent of the initial level, \$42.98.

## Valuation

This product can be valued as a combination of a note from Bank of Montreal, one short out-of-the-money put option, one long at-the-money call option, and one short out-of-the-money call option. For reasonable valuation inputs this note was worth \$976.72 when it was issued on March 18, 2013 because the value of the options investors gave Bank of Montreal plus the interest investors would have received on Bank of Montreal's straight debt was worth \$23.28 more than the options investors received from Bank of Montreal.

There is no active secondary market for most structured products. Structured products, including this note, therefore are much less liquid than simple stocks, bonds, notes and mutual funds. Investors are likely to receive less than the structured product's estimated market value if they try to sell the structured product prior to maturity. Our valuations do not incorporate this relative lack of liquidity and therefore should be considered an upper bound on the value of the structured product.

#### Payoff Curve at Maturity

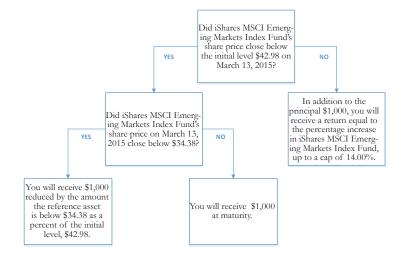

The payoff diagram shows the final payoff of this note given iShares MSCI Emerging Markets Index Fund's share price (borizontal axis). For comparison, the dashed line shows the payoff if you invested in iShares MSCI Emerging Markets Index Fund directly.

# **Analysis**

This Buffered Bullish Return Note pays investors the increase in iShares MSCI Emerging Markets Index Fund capped at 14.00%, but if iShares MSCI Emerging Markets Index Fund declines over the term of the note, investors will suffer losses equal to the percentage decline in iShares MSCI Emerging Markets Index Fund. In addition, investors bear the credit risk of Bank of Montreal. Investors purchasing this Buffered Bullish Return Note effectively sell at-the-money put and out-of-the-money call options to Bank of Montreal, buy at-the-money call options, and a zero-coupon note from Bank of Montreal. This Buffered Bullish Return Note is fairly priced if and only if the market value of the options investors received from Bank of Montreal equals the market value of the options investors gave Bank of Montreal plus the interest investors would have received on Bank of Montreal's straight debt.

## Bank of Montreal's Stock Price

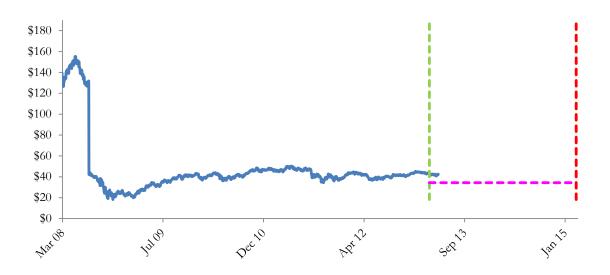

The graph above shows the adjusted closing price of the issuer Bank of Montreal for the past several years. The stock price of the issuer is an indication of the financial strength of Bank of Montreal. The adjusted price shown above incorporates any stock split, reverse stock split, etc.

Credit default swap (CDS) rates are the market price that investors require to bear credit risk of an issuer such as Bank of Montreal. CDS rates are usually given in basis points (bps). One basis point equals 0.01%. Higher CDS rates reflect higher perceived credit risk, higher required yields, and therefore lower market value of Bank of Montreal's debt, including outstanding Buffered Bullish Return Note. Fluctuations in Bank of Montreal's CDS rate impact the market value of the notes in the secondary market.

### iShares MSCI Emerging Markets Index Fund's Share Price

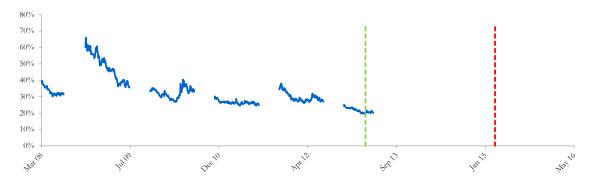

The graph above shows the historical levels of iShares MSCI Emerging Markets Index Fund for the past several years. The final payoff of this note is determined by iShares MSCI Emerging Markets Index Fund's share price correspond to a greater uncertainty in the final payout of this Buffered Bullish Return Note.

# Realized Payoff

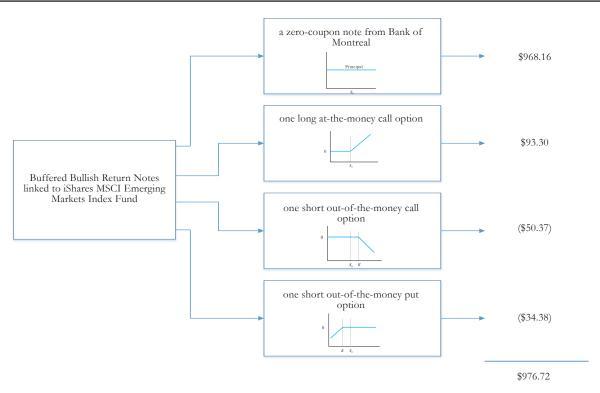

This product will mature on March 18, 2015.

### Reference Asset iShares MSCI Emerging Markets Index Fund's Implied Volatility

The annualized implied volatility of iSbares MSCI Emerging Markets Index Fund on March 13, 2013 was 19.83%, meaning that options contracts on iSbares MSCI Emerging Markets Index Fund were trading at prices that reflect an expected annual volatility of 19.83%. The higher the implied volatility, the larger the expected fluctuations of iSbares MSCI Emerging Markets Index Fund's share price and of the Note's market value during the life of the Notes.

## Decomposition of this Buffered Bullish Return Note

This note can be decomposed into different components, and each component can be valued separately. The chart above shows the value of each component of this Buffered Bullish Return Note.

- 1. Delta measures the sensitivity of the price of the note to the iShares MSCI Emerging Markets Index Fund's share price on March 13, 2013.

  2. CDS rates can be considered a measure of the probability that an issuer will default over a certain period of time and the likely loss given a default. The lower the CDS rate, the lower the default probability. CDS rate is given in basis points (1 basis point equals 0.01%), and is considered as a market premium, on top of the risk-free rate, that investors require to insure against a potential default.

  3. Fair price evaluation is based on the Black-Scholes model of the iShares MSCI Emerging Markets Index Fund on March 13, 2013.

  4. Calculated payout at maturity is only an approximation, and may differ from actual payouts at maturity.

  5. Our evaluation does not include any transaction fees, broker commissions, or liquidity discounts on the notes.
