Buffered PLUS linked to Vectors Gold Miners Exchange-Traded Fund

Description

Morgan Stanley issued \$7.24 million of Buffered PLUS linked to Vectors Gold Miners Exchange-Traded Fund on March 20, 2012 at \$10 per note.

These notes are Morgan Stanley-branded Buffered PLUS securities that do not pay periodic coupons, but instead pay a single amount at maturity depending on the final level of Vectors Gold Miners Exchange-Traded Fund.

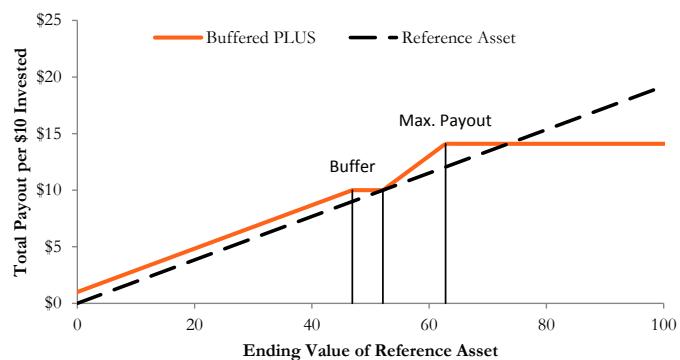

If on March 17, 2014 Vectors Gold Miners Exchange-Traded Fund's share price is higher than \$52.11, but lower than \$62.79, the notes pay a return equal to the percentage increase in Vectors Gold Miners Exchange-Traded Fund multiplied by 2.0, up to a cap of 41.00%. If on March 17, 2014 the refe is below \$52.11 but not below \$46.90, investors receive \$10 face value per note. If Vectors Gold Miners Exchange-Traded Fund's share price on March 17, 2014 is lower than \$46.90, investors receive face value per note reduced by the amount the reference asset is below \$46.90 as a percent of the initial level, \$52.11.

Valuation

This product can be valued as a combination of a note from Morgan Stanley, one short out-of-the-money put option, two long at-the-money call options, and two short out-of-the-money call options. For reasonable valuation inputs this note was worth \$9.40 when it was issued on March 20, 2012 because the value of the options investors gave Morgan Stanley plus the interest investors would have received on Morgan Stanley's straight debt was worth \$0.61 more than the options investors received from Morgan Stanley.

There is no active secondary market for most structured products. Structured products, including this note, therefore are much less liquid than simple stocks, bonds, notes and mutual funds. Investors are likely to receive less than the structured product's estimated market value if they try to sell the structured product prior to maturity. Our valuations do not incorporate this relative lack of liquidity and therefore should be considered an upper bound on the value of the structured product.

Payoff Curve at Maturity

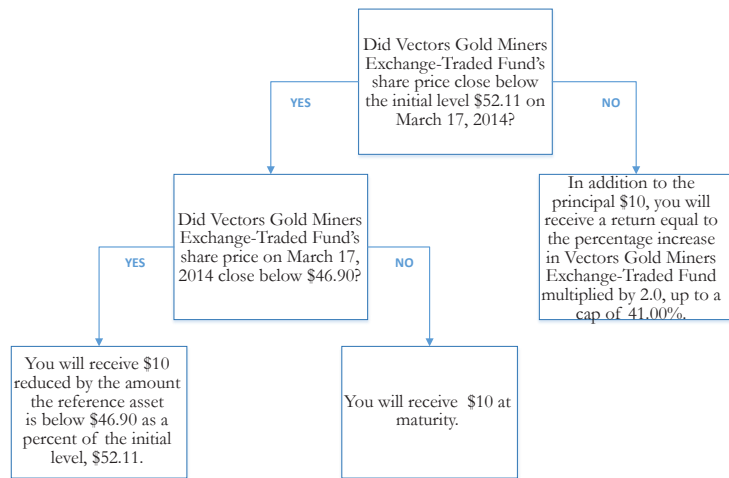

The payoff diagram shows the final payoff of this note given Vectors Gold Miners Exchange-Traded Fund's share price (horizontal axis). For comparison, the dashed line shows the payoff if you invested in Vectors Gold Miners Exchange-Traded Fund directly.

Principal Payback Table

Vectors Gold Miners Exchange-Traded Fund	Note Payoff
\$0.00	\$1.00
\$5.21	\$2.00
\$10.42	\$3.00
\$15.63	\$4.00
\$20.84	\$5.00
\$26.06	\$6.00
\$31.27	\$7.00
\$36.48	\$8.00
\$41.69	\$9.00
\$46.90	\$10.00
\$52.11	\$10.00
\$57.32	\$12.00
\$62.53	\$14.00
\$67.74	\$14.10
\$72.95	\$14.10
\$78.17	\$14.10

Maturity Payoff Diagram

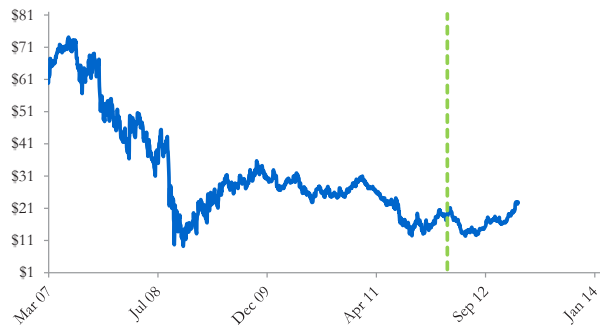

The contingent payoffs of this Buffered PLUS.

Analysis

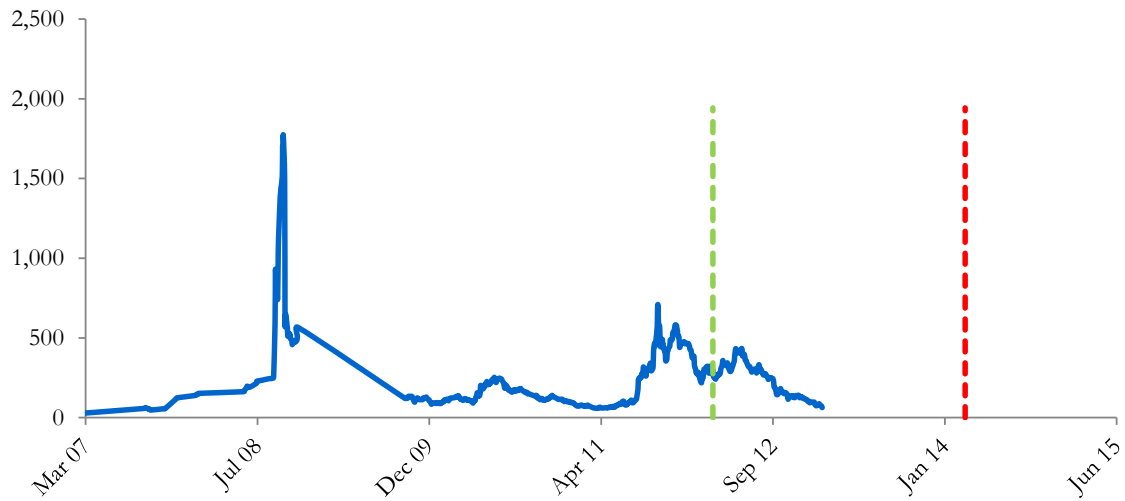

This Buffered PLUS pays investors the increase in Vectors Gold Miners Exchange-Traded Fund multiplied by 2.0 capped at 41.00%, but if Vectors Gold Miners Exchange-Traded Fund declines over the term of the note, investors will suffer losses equal to the percentage decline in Vectors Gold Miners Exchange-Traded Fund. In addition, investors bear the credit risk of Morgan Stanley. Investors purchasing this Buffered PLUS effectively sell at-the-money put and out-of-the-money call options to Morgan Stanley, buy at-the-money call options, and a zero-coupon note from Morgan Stanley. This Buffered PLUS is fairly priced if and only if the market value of the options investors received from Morgan Stanley equals the market value of the options investors gave Morgan Stanley plus the interest investors would have received on Morgan Stanley's straight debt.

Morgan Stanley's Stock Price

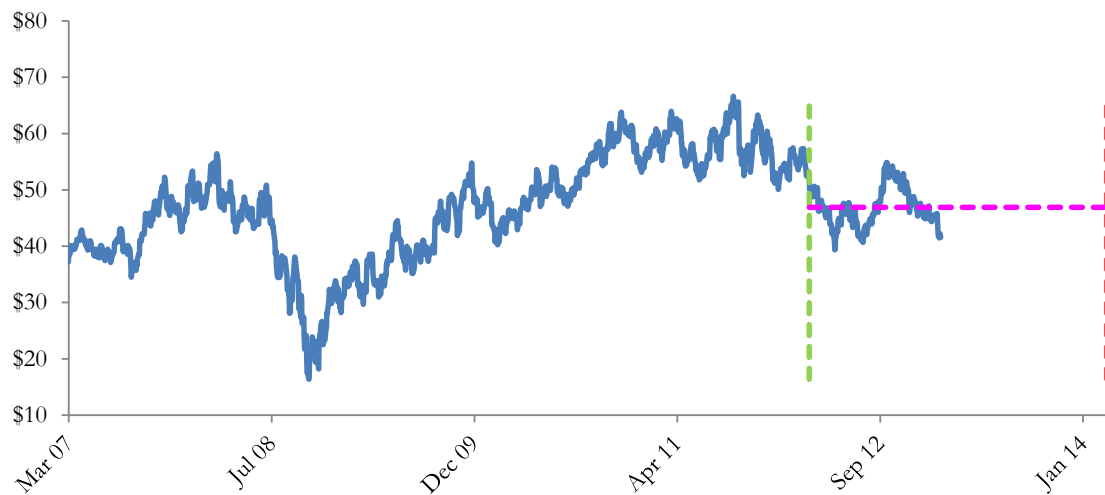

The graph above shows the adjusted closing price of the issuer Morgan Stanley for the past several years. The stock price of the issuer is an indication of the financial strength of Morgan Stanley. The adjusted price shown above incorporates any stock split, reverse stock split, etc.

Morgan Stanley's CDS Rate

Credit default swap (CDS) rates are the market price that investors require to bear credit risk of an issuer such as Morgan Stanley. CDS rates are usually given in basis points (bps). One basis point equals 0.01%. Higher CDS rates reflect higher perceived credit risk, higher required yields, and therefore lower market value of Morgan Stanley's debt, including outstanding Buffered PLUS. Fluctuations in Morgan Stanley's CDS rate impact the market value of the notes in the secondary market.

Vectors Gold Miners Exchange-Traded Fund's Share Price

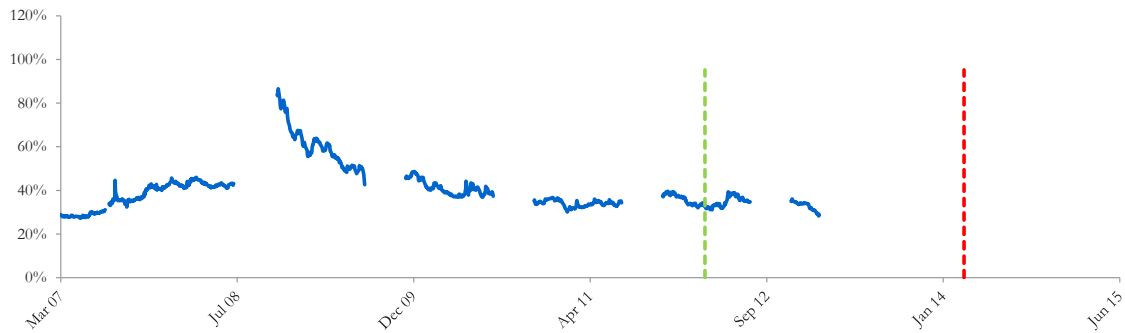

The graph above shows the historical levels of Vectors Gold Miners Exchange-Traded Fund for the past several years. The final payoff of this note is determined by Vectors Gold Miners Exchange-Traded Fund's share price at maturity. Higher fluctuations in Vectors Gold Miners Exchange-Traded Fund's share price correspond to a greater uncertainty in the final payout of this Buffered PLUS.

Realized Payoff

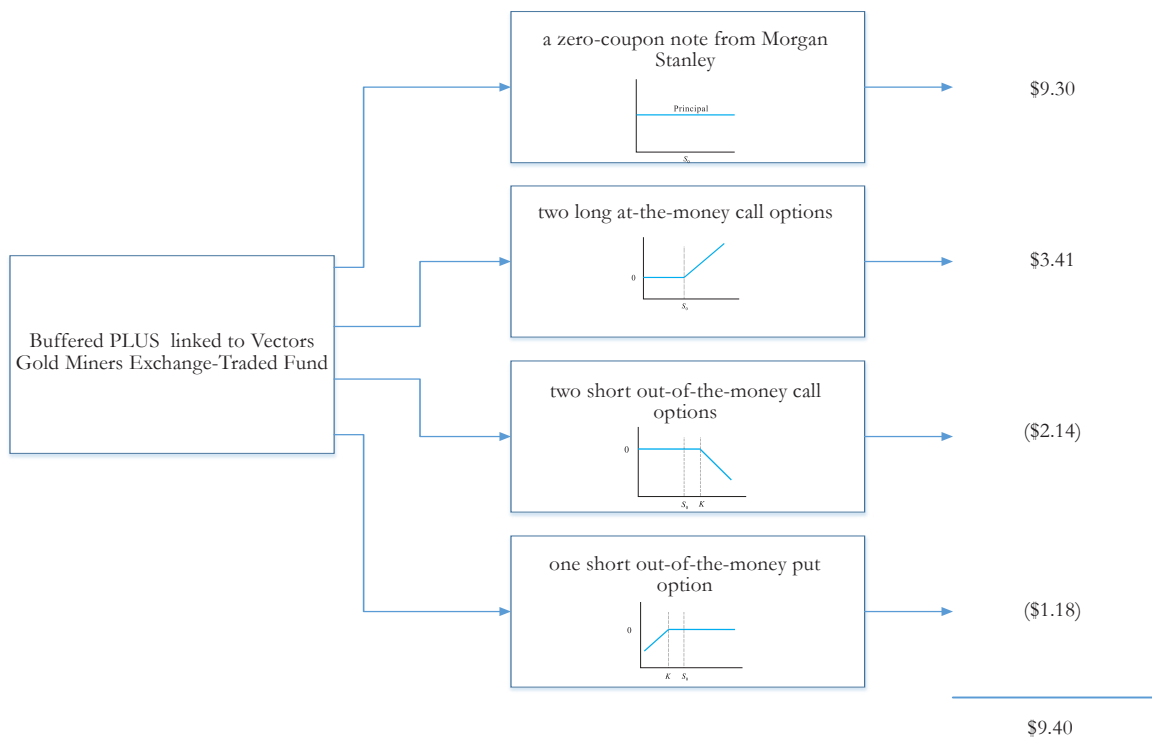

This product will mature on March 20, 2014.

Reference Asset Vectors Gold Miners Exchange-Traded Fund's Implied Volatility

The annualized implied volatility of Vectors Gold Miners Exchange-Traded Fund on March 13, 2012 was 32.50%, meaning that options contracts on Vectors Gold Miners Exchange-Traded Fund were trading at prices that reflect an expected annual volatility of 32.50%. The higher the implied volatility, the larger the expected fluctuations of Vectors Gold Miners Exchange-Traded Fund's share price and of the Note's market value during the life of the Notes.

Decomposition of this Buffered PLUS

This note can be decomposed into different components, and each component can be valued separately. The chart above shows the value of each component of this Buffered PLUS.

1. Delta measures the sensitivity of the price of the note to the Vectors Gold Miners Exchange-Traded Fund's share price on March 13, 2012.
2. CDS rates can be considered a measure of the probability that an issuer will default over a certain period of time and the likely loss given a default. The lower the CDS rate, the lower the default probability. CDS rate is given in basis points (1 basis point equals 0.01%), and is considered as a market premium, on top of the risk-free rate, that investors require to insure against a potential default.
3. Fair price evaluation is based on the Black-Scholes model of the Vectors Gold Miners Exchange-Traded Fund on March 13, 2012.
4. Calculated payout at maturity is only an approximation, and may differ from actual payouts at maturity.
5. Our evaluation does not include any transaction fees, broker commissions, or liquidity discounts on the notes.
